Subject: SCE&G Dominion proposal - upcoming public meeting

To whom it may concern:

I have attended many PSC public meetings in the past about SCE&G rate increases and voiced my opinion, to no avail.

This is very upsetting. It appears to me that the ORS and the PSC have already made decisions before these public meetings, where the public input is just a formality that amounts to nothing.

This upcoming meeting to determine Dominion's offer should -not- be concluded -before- the public input.

I have questions about the current investors. I believe your office should have access to, and should have already investigated whether any current or past SC legislature are or were shareholders in SCANA or SCE&G stock. If there are SC legislatures, I believe that would be a solid "conflict of interest", and certainly have a bearing on "ethics" and what decision will be made for Dominions deal.

I would like to see written evidence that your office has performed this investigation and emailed to me.

I do not believe we the customers should have to continue to pay for this grossly mismanaged project while the upper management received bonus awards and the shareholders profited.

To me resolution should be directed toward those that reaped the profits not the customers.

Again, I would like to see written evidence that your office has performed this investigation of the legislature shareholders and emailed to me.

Jim Matthews
